

Donatella Guzzoni

dguzzoni@outlook.it

Structural civil engineer, graduate of Politecnico di Milano, has over thirty years of experience in designing, site managing and testing works in reinforced concrete, steel, wood and brick, as well as handling each of their inherent technological issues, focusing particularly on the aspects of degradation and restoration. Editor-in-chief of the journal since '91. Founding partner of ATE (Association for building technologists) and chairperson of the same since 1996. Partner of CTA, CTE, ANIDIS, AICAP, Italian associations for steel, precast, seismic engineering, and concrete; member of the UNI's Commission of Structural Engineering (Italian Organization for Standardization) and Member of the Directive Councils of UNSIDER (Italian organization for standardization of iron and steel). Member of the Commission of "Costruzioni (Buildings)" of the CNI (National Council of the Association of Engineers), representative of the same CNI at the CSLPP (General Assembly of the High Council of Public Works c/o Minister of Infrastructure and Transport) in the advisory board for monitoring the Technical Standards for buildings DM 2005 (Ministerial Decree for the technical standards for buildings) and for DM 2008. Instructor for many professional training courses; organizer, coordinator and/or speaker at courses and conferences held by various Engineering Guilds and many sector Associations in the fields of structural engineering and materials technology. From 2006 to 2013 chairperson of the Association of Engineers for the Province of Bergamo. For "Gruppo 24 ore", acted as editor for the publications: "Norme Tecniche per le costruzioni: analisi e commenti of D.M. 14 settembre 2005" (April 2006), "Norme Tecniche per le Costruzioni - M 14 gennaio 2008 coordinato con la Circolare n.617 del 2 febbraio 2009" (May 2010) and "Guida alla interpretazione e applicazione del DM 14 01 2008 e della Circolare 617/2009" (May 2010).
